4-dimensional surgical lighting
“At STERIS, we haven’t tried to produce one lighting system to suit everybody but lighting systems adapted to each of your specialities”

Jean-Marie L’Hégarat - R&D Director
XLED® A NEW GENERATION OF SURGICAL LIGHTING SYSTEMS

With over a century of experience in the field of medical equipment, STERIS continues to offer innovating solutions to personnel in the hospital world.

Our mission: useful innovation!

A new outlook on lighting

Our engineers have totally rethought the surgical lighting concept. A revolutionary concept: the spot. This makes the XLED® range the most comprehensive surgical light offering on the market, from the single fixed spot to task-adjustable multi-spot systems covering the requirements of all surgical specialities. Whatever the configuration, XLED® offers the ideal intensity and amount of light for each application.

AN EXCLUSIVE DESIGN

Optimised laminar flow

The fluid and open shape of the XLED® allows it to optimise the laminar flow output... and thus contribute to patient safety.
XLED® OFFERS ALL THE BENEFITS OF LED TECHNOLOGY

Prime choice LEDs
Not all LEDs are the same! STERIS has selected the best LEDs in order to guarantee excellent lighting quality:
• Rated life ≥ 40,000 hours
• Excellent Colour Rendering Index (RA = 95) and particularly for the deep saturated red index (R9 = 97)
• Pattern homogeneity (no rainbow effects) for enhanced visual comfort
• Delivering up to 160,000 Lux

Shadow reduction
The 20 LED array in each spot produces 20 patterns that are perfectly superimposed: if the operating field is partially obstructed, the area remains evenly lit.

The exclusive Wavelens system
Available as standard on XLED3 and XLED4, this patented system is used to instantly adjust the pattern diameter through beam divergence. Adjustment is simple and intuitive: the lighthead does not need to be refocused or repositioned. Lighting quality is maintained.

Why do we use white LEDs?
Light emitted by white LEDs remains constant: its properties do not change over time. White LED technology has now come of age and offers a wide range of benefits.

• A simple and efficient system
  White LEDs do not require recalibrating and, therefore, no expensive annual maintenance.

• Excellent colour rendering
  XLED® white LEDs guarantee precise colour rendering, a feature that is especially important as far as reds are concerned, in order to be able to identify tissue, vessels and bones etc.
  The different shades of red are very accurately rendered.

From 25 to 30 cm
XLED® A UNIQUE AND USEFUL INNOVATION

1 MANOEUVRABILITY
The XLED® spot design provides a lightweight and balanced system, making its positioning an easy task. There is a single cardanic version for operating theatres with low ceilings.

2 EASILY ADJUSTED
Dual control: directly accessible from the lighting suspension or from the wall-mounted unit (touch screen).

3 EXCELLENT LAMINAR FLOW DELIVERY

4 AMBIENT LIGHTING
Endoscopic procedures now form part of every specialisation. The XLED® range meets this requirement with its standard ambient lighting. Its intensity is also adjustable.

5 MAINTENANCE
XLED® is compatible with all existing procedures. The choice of materials and the quality of finishes are determining factors: smooth surfaces, silicon joints etc.

6 PERFORMANCE
The spot that makes up the XLED® range also provides better energy dissipation and thus helps to enhance LED longevity and maintain performance. An on/off switch is used to fully switch off lighting and thus reduce energy consumption by avoiding a systematic standby mode.
An intensive care unit does not need the same type of lighting as an operating theatre or even a delivery room: the quantity and volume of light will vary considerably. Because it is modular, the XLED® surgical lights range provides a precise solution to each need.
The XLED®
DUO XLED4 Lighting - 1

The XLED®
XLED2 / XLED3 Lighting Systems

Surgery
• Cardiac
• Thoracic
• Vascular

Surgery
• General
• Gynaecology/Urology
• Orthopaedics
• Hybrid operating theatres

• Up to 2 x 160,000 Lux of light available for the XLED3 and the XLED4
• 25 to 30 cm pattern diameter (Wavelens technology for the XLED3 and the XLED4)
• Shadow reduction

• Cold light: tissue-respectful
• Laminar flow compatible
• Ambient lighting as standard
**XLED1 / XLED3 Lighting Systems, 1 screen**

- 1 spot lighting ideal for deep cavities
- Lightweight and manoeuvrable
- Ambient lighting as standard

**Surgery**
- ENT
- Neurosurgery
- Orthopaedics

**XLED2 Duo Lighting System**

- Laminar flow compatible
- Option of adapting a monitor holder and/or camera holder
- HD Camera

**Surgery**
- General
- Gynaecology
- Ophthalmology
- Neurosurgery
- ENT
The XLED®

XLED1 Lighting System

- Surgery
- Intensive care unit
- Emergency room

- The lighting intensity is appropriate to all applications, from 45,000 to 90,000 Lux
- The spot is designed for a positioning avoiding any obstruction: the surgical area receives 100% of the light
- A 16 cm pattern diameter is ideal for examination room applications

The XLED®

XLED2 Lighting System

- Induction room
- Examination room

- Delivery rooms
- Emergency treatment rooms
- ENT - stomatology

- 55,000 to 110,000 Lux intensity (from examination to procedure)
- 25 cm diameter pattern
- Available as a single cardanic version

**A RANGE OF HANDLES AND ADAPTORS**

1. The sterile handle has been designed to withstand at least 1,000 sterilisation cycles.
2. STERIS single-use sterile handle holder and adaptor

## INSTALLATION

**Electricity supply**
The XLED® is easily installed in all premises, whether new or existing:
- Wall-mounted box for quick and easy installation in operating theatres
- Wall control relay and remote wall-mounted box for a discrete installation
STERIS: A SUSTAINABLE COMMITMENT

The STERIS Centre of Excellence brings together Sales, Administration, Marketing, Engineering, Research & Development and Manufacturing teams covering Europe / the Middle East and Africa. This structure controls the entire value chain for all products whether used in the operating theatre block or for infection prevention.

XLED®: AN ENERGY-EFFICIENT LIGHTING SYSTEM

Consuming a mere 85 Watts in its most powerful configuration and delivering 160,000 Lux, XLED® has a particularly lower power consumption.

The production site in France, in partnership with proximity suppliers, has led to a noticeable reduction in the product’s carbon footprint.

MANUFACTURING IN EUROPE: STERIS’ CHOICE

For STERIS, opting for manufacture in Europe was not a haphazard choice. It is part of our insistence on quality:
• Wholly controlling the quality of our output
• Capitalising on the knowledge and expertise of French engineers and technicians
• Integrating the best European suppliers
• Monitoring and reacting to the demands of our users clients
• Reducing our ecological footprint

ÉCOLE DE DÉVELOPPEMENT & DESIGN
STERIS: A COMPLETE RANGE FOR THE HOSPITAL TECHNICAL ENVIRONMENT

With 5,500 employees worldwide, STERIS is a major player in the field of health. A partner to more than 25,000 clients in more than 80 countries, STERIS is present throughout the surgical unit with STERIS Surgical. In addition to XLED® surgical lighting systems, STERIS also offers a comprehensive range: operating tables, arms and integration systems. STERIS is also active in the field of infection prevention technologies through STERIS IPT (Infection Prevention Technology): washing, disinfection and sterilising equipment and consumables.

A WIDE RANGE OF OPERATING TABLES

- Surginox
- Unimax
- Easymax
- Himax
- Cmax S/T

SURGICAL LIGHTING SYSTEMS

- Harmony VLED®
- Harmony LED®
- XLED®

AIRport ARMS

- Intensive Care Unit
- Arms
- Mini-invasive surgery
- Surgery
- Motorised column and arm

HARMONY INTEGRATION SYSTEMS
